

Age Restricted Vending

Instantly verify age and identity to dispense cannabis and CBD products without the need for an attendant or budtender.

How Age Restricted Vending Works

- 1 Product Selection**
The machine's LED touch screen allows for product browsing and selection.
- 2 Payment Processing**
Customers complete checkout using MagTek's DynaFlex Pro Kiosk.
- 3 Age Verification**
Customers insert their driver's license or ID into the scanner, which authenticates the ID in seconds using UV, infrared, and white light, as well as checks against hologram and watermark libraries.
- 4 Identity Validation**
Customers are guided through a series of randomized liveness checks which protect against spoofing, and ensure their face matches the photo on their ID.
- 5 Purchase Completion**
The customer's credit card is charged and product is dispensed via the machine's delivery chute.

Machine Specifications

ARV uses the Fastcorp DIVI Cool machine, which offers 7 cubic feet (200L) of interior, temperature controlled inventory space. The machine is rated for both indoor and sheltered outdoor use.

Height	72.5" (184.2cm)	Volume	7 cubic feet (200 cubic liters)
Width	41" (104.2cm)	Capacity	300 - 450 items (depending on item volume)
Depth	37" (91.4cm)	Cooling Temperature	15°F (5°C) - 26°F (21°C)
Weight (when filled)	625lb (284kg)	Warranty	5 years limited parts / 2 year refrigeration unit

Payment Processing

For purchase of cannabis products, the ARV machine accepts NFC contactless from mobile wallets and wearables, EMV Contactless cards, EMV Contact Chip, and magnetic stripe.

The built-in barcode reader also makes it possible to accept payments via QR Code and 1D/2D barcodes.

Our team has relationships with merchant service providers who work within the cannabis industry.

About the Software

- Highly configurable, our software allows for the machine owner to set a configurable age threshold (18+, 21+, etc.), and determine PII retention settings.
- You'll easily be able to upload inventory images and manage inventory through a flexible interface.
- The machine features a 43" touchscreen which can be integrated with your photos, video, and logos.
