

# ID Verification for Dispensaries

Increase compliance, reduce wait times, and streamline operations

Scan your guest's driver's license, state-issued ID, or passport.

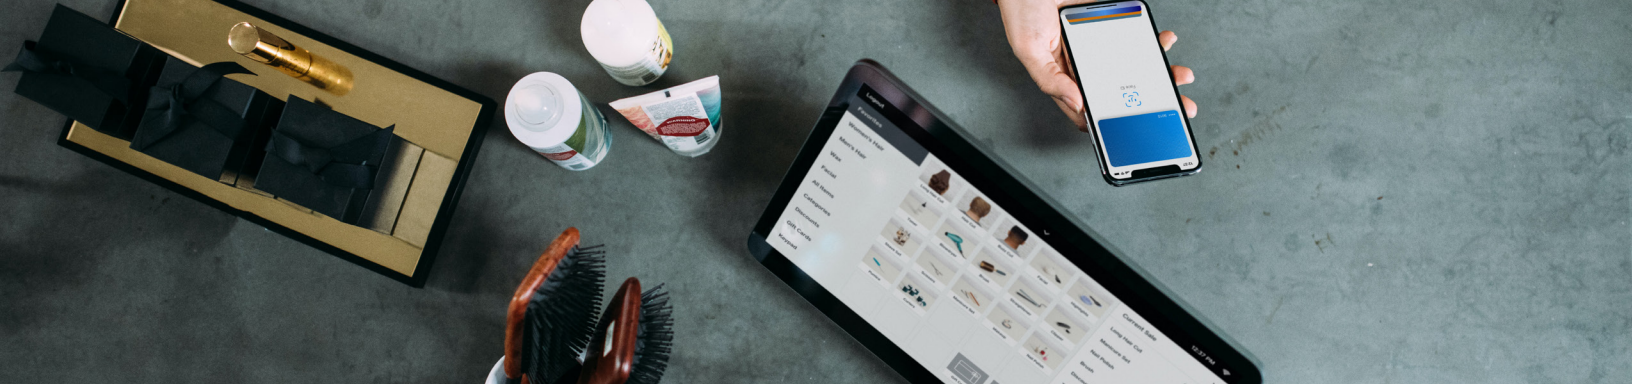

VeriScan software will alert you immediately if the 2D barcode indicates the ID is fake, the ID is expired, or the guest is under the legal age to purchase.

Send guest information directly to your Point of Sale for a seamless, personalized purchasing experience.

## Benefits

- Configure VeriScan to automatically meet state-level compliance requirements for PII handling and audit trails.
- Settings related to state-level compliance needs are updated at no cost to you.
- Anti-looping alerts help you avoid costly penalties.
- Streamline your check-in process to include customer image capture. Nobody likes long wait times and everyone likes to be personally greeted.
- Understand your customer. Aggregate demographic information stored on the ID (such as age, gender, and zip code) to get to know your current customers and attract new ones.
- Build lists of banned individuals to enhance your dispensary security.
- Customize your data retention settings (immediate, day, month, perpetual).

## Integrate Veriscan

In addition to operating as a standalone solution, IDScan.net VeriScan can be integrated into your POS or ERP system. We have partnerships with leading industry software providers.

**LeafLogix**  
SEED-TO-SALE CANNABIS ERP

**dutchie**

**BLAZE**<sup>®</sup>

**Sweed**

**greenbits**  
a dutchie company

**COVA**<sup>™</sup>

## Go Live With VeriScan

We stock a variety of scanners that can provide all levels of ID verification and digital analysis to support the rapidly scaling cannabis industry. VeriScan software can be set up in less than one day using our step-by-step installation guide. Your US-based Customer Support will walk you through configuration and go-live, and is available 24/7.
