Add facial recognition	-
Send checkin and guest information directly to POS	-
Add third party database checks (DMV, FBI, etc.)	-
-	Guest lists
Add vehicle information and link to customer profiles	-

VeriScan Flexibility

VeriScan is the only ID verification platform that works on all commonly used scanners. Whether you are looking for basic age verification, or want to integrate more in-depth ID authentication, VeriScan makes things straightforward and easy to use.

Thales QS2000

Inexpensive with outstanding passport reading capabilities for those with an international clientele.

Panasonic FZN1 Toughbook

Durable, great for front door checks and exterior scanning, but limited in full authentication capabilities.

Thales AT10000

Great camera for image capture and full screen scanning for passports. But image flipping can slow down line management.

E-Seek M500

Perfect for dual-sided ID scanning and offers precise authentication. However, needs a table or kiosk to stand on.

Because VeriScan is used by businesses across a variety of industries, our solution is meant to be flexible for all scanning applications. Our sales team can help you select the right hardware and software match to meet your needs.

About IDScan.net

IDScan.net is the leading identity verification and digital analysis platform, powering turnkey software and flexible, customized ID solutions for more than 6,500 of the world's most trusted brands across all industries. | **www.idscan.net**
