

# ID Scanning & Visitor Management

for military bases and secure facilities

IDScan.net is proud to provide best-in-class ID fraud protection for guarded sites, military installations, and other high security facilities.

Using a combination of handheld ID scanners, ID authentication, and unattended ID-activated door locks we help organizations improve their access management to keep their premises secure.

## Handheld ID scanning

Improve the speed and security of your entrance gate(s) with a Zebra TC26 ID scanner with VeriScan.

VeriScan uses the power of the Zebra TC26's autofocus laser to rapidly read IDs, drivers licenses, and passports, and save visitor data to the secure cloud. Visitors can be added to groups and lists using the scanner's touchscreen interface, and easy-to-read popups will alert your security staff if an ID shows signs of being suspicious. All handheld scanners can be linked to the same cloud account, ensuring multiple gates remain in-sync at all times.

Add VeriScan to your existing fleet of ID scanners, or purchase new Zebra TC26 units with a one year warranty.

### Specifications

- ✓ Approved for use by US military on-base
- ✓ Band 14 frequency capability
- ✓ Waterproof, dustproof, and fortified with Gorilla Glass
- ✓ 5" high-definition touchscreen

# ID Authentication

For detection of fake IDs, **IDScan.net** offers ID authentication using powerful, forensic document readers. These devices are capable of examining each ID under **white light, infrared light, and ultraviolet light**. Each ID is rapidly analyzed using AI to detect anomalies, even **sophisticated, foreign-made forgeries**.

Requires use of an **E-Seek M500, Thales CR5400, or Thales AT10K** forensic document reader and a Windows-based computer.

## How ID authentication detects 95% of fake IDs

- Hologram examination
- Microprint pixel review
- 400+ AI-driven template checks
- 2D barcode analysis
- Front/back crossmatch

# Third Party Checks

For an even deeper level of identity verification, customers can layer on third party identity checks such as **DMV data verification**, **criminal background checks**, **Social Security Administration checks**, **utility and telco record checks**, and more. These checks can be performed on-demand in real time and provide rapid assurance that an individual is safe to invite on-base. **Price per scan.**

# Third Party Checks

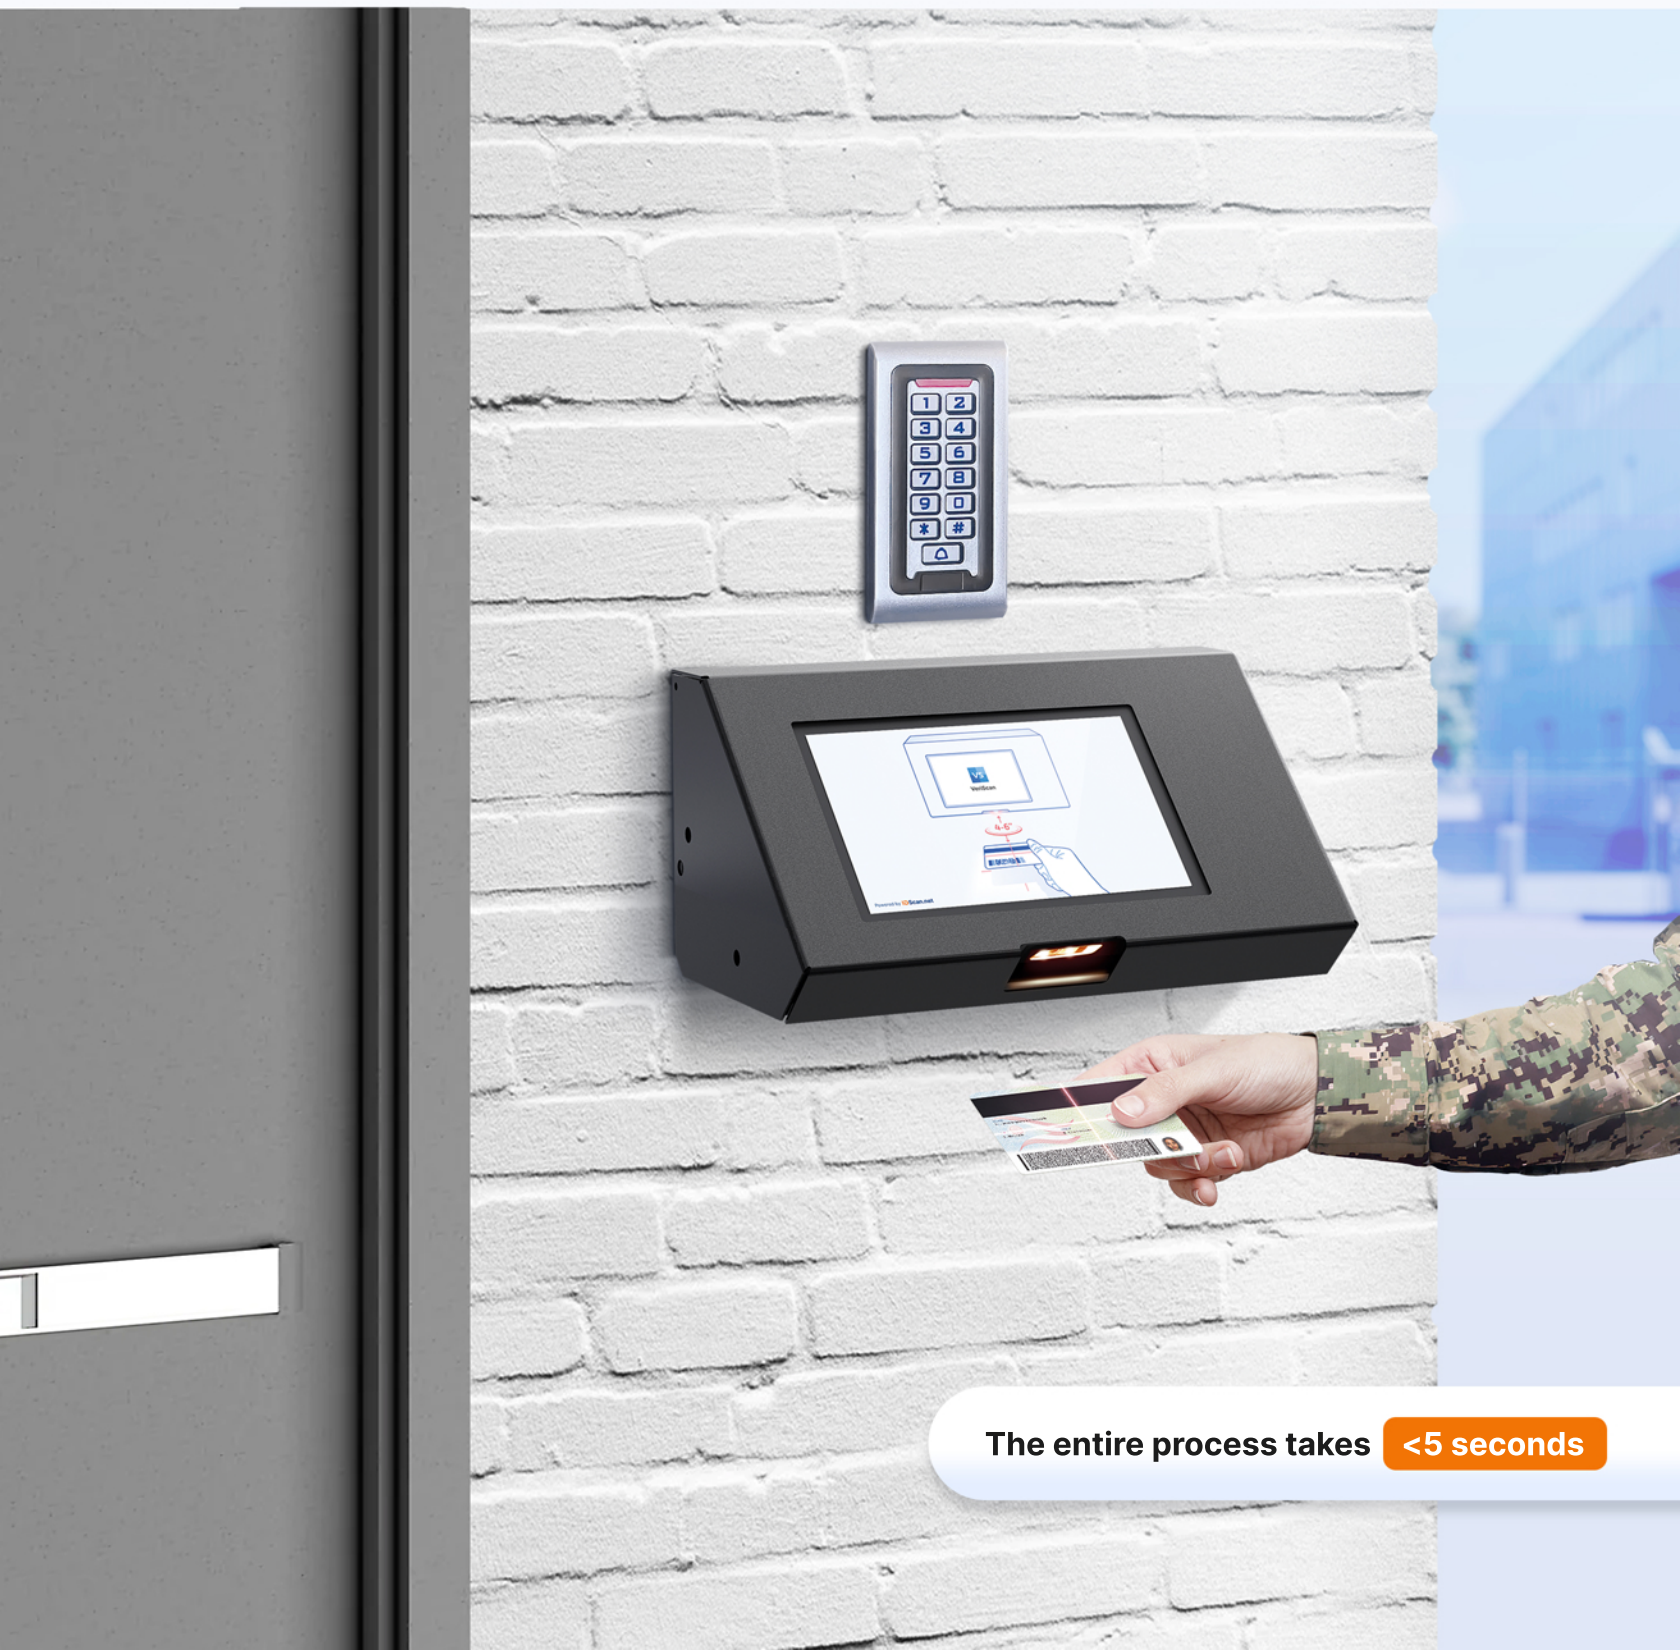

- DMV Checks for 40 U.S. States
- Sex Offender Registry
- IdentifiFraud
- Politically Exposed Person
- Office of Foreign Asset Control (OFAC)
- Criminal Background Checks

## Unattended Access Management

**VeriLocks** is ID scanning integrated with door locking mechanisms - mount **VeriLocks** at a secure door, and let your employees or visitors use their ID for access. The mounted tablet uses **pre-set Allow Lists** which are based on ID data (first name, last name, ID number, etc.). When an approved guest scans their ID, **VeriLocks** triggers the door to unlock, and creates a detailed, time-stamped log of every entry.

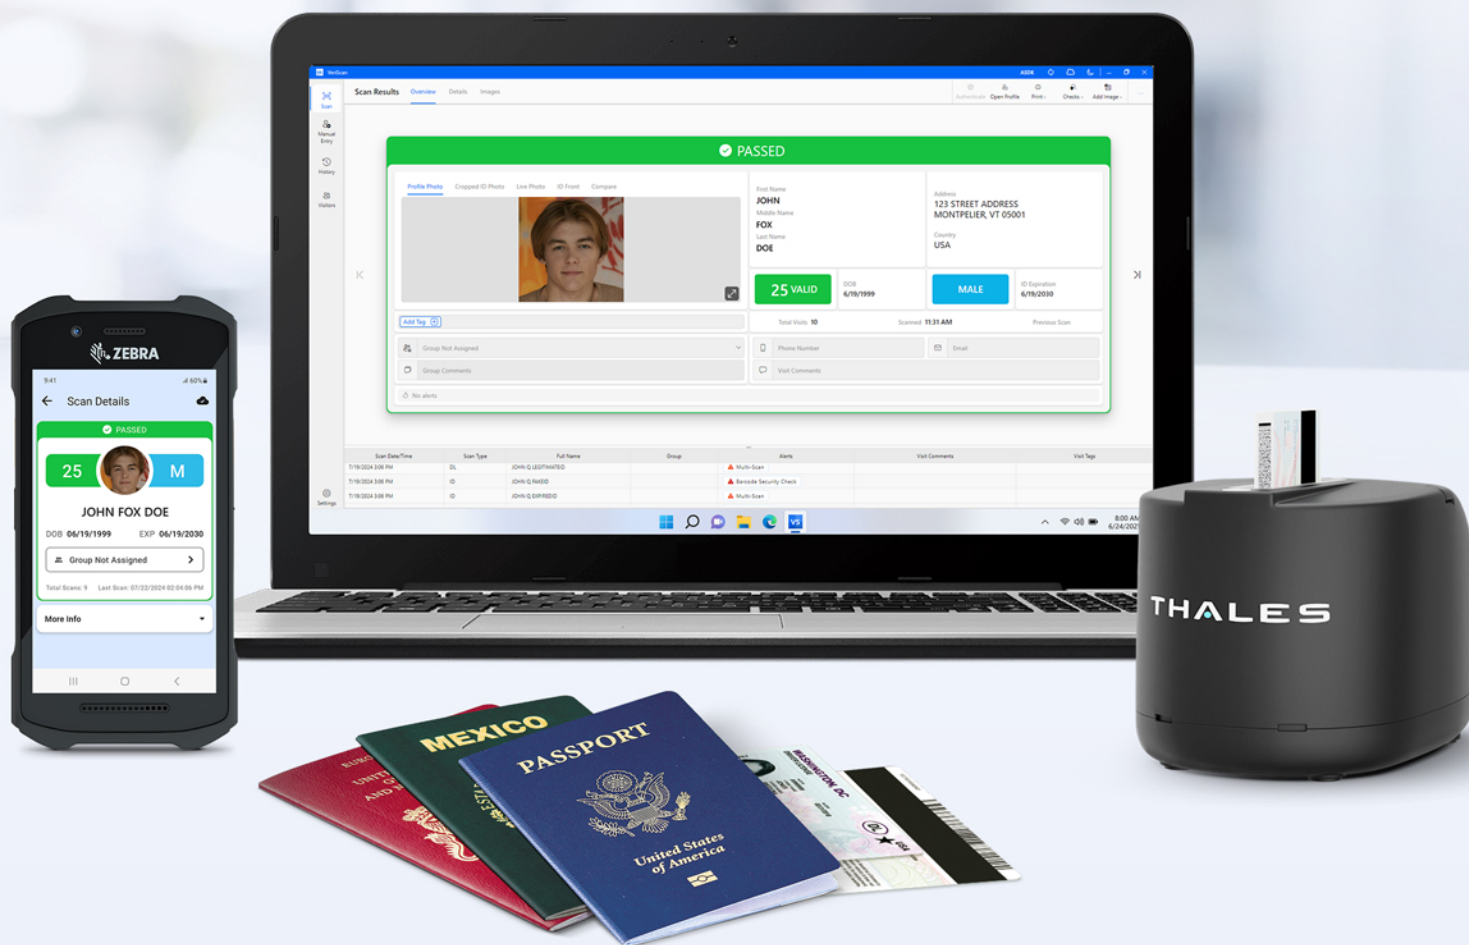

The entire process takes **<5 seconds**

# Identity verification platform

Sync scan data across all your ID verification touchpoints with **VeriScan Cloud**. In the cloud-based portal you can view scan history, add individuals to groups, annotate or modify visitor profiles, export history, and set up your PII and data retention policy.

Inside the portal you can perform detailed fraud investigations and perform third party checks on suspicious individuals, as well as managing your Employee and Allow lists to streamline the experience for your valued guests.

The **VeriScan** identity platform **makes it easy to stay secure** across every entrance, exit, and door, and deeply understand who is onsite at any given time.

## About **IDScan.net**

IDScan.net is the leading AI-powered identity verification platform focusing on security, compliance, and prevention of ID fraud. We help **7,500 customers** such as the **US Coast Guard**, **US Border Patrol**, **Shell**, **Circa Casino**, and **Gamestop** to verify **15,000,000 identities** monthly.
