

ParseLink

Scan and authenticate IDs, parsing data directly into any application

ParseLink is IDScan.net's data entry and form fill software that allows you to capture an individual's information from an identity document and autopopulate fields directly into any form, database, software platform, or application - all with the scan of an ID or passport.

ParseLink in Action

Using a Windows-compatible ID scanner or ID authentication device, you can scan each customer's ID, drivers license, passport, or other government-issued ID. ParseLink software - powered by our industry-leading ID scanning technology - collects the data from the ID and automatically populates any form.

Eliminate Typing

No more manual data entry.

ParseLink instantly ingests all data stored on an ID, allowing for rapid capture of fields such as first name, last name, and date of birth, saving valuable manhours.

Eliminate Typos

100% accurate data.

Entering customer data creates a risk of typos and fat fingers which can lead to inaccurate data, double entries and duplicates, and non-compliance. ParseLink ensures complete accuracy with every ID scan.

Increase Enrollment

Make sign up fast and accurate.

When signing up customers for loyalty programs or credit cards, you can improve take rate by removing the need for lengthy, manual data entry.

Compatible Software

ParseLink can send data to both Windows-based and cloud-based software. More than 10,000 customers are using ParseLink to send data to property management systems, CRMs, point-of-sale software, KYC tools, bank teller software, loan application forms, and more.

How it Works

Use an ID scanner to scan an ID or passport. The ParseLink software reads the data stored in the ID's symbology. Your ParseLink profile sends each field stored on the ID into your system in real time.

ID Authentication

Looking to catch fake IDs?

Use ParseLink Enterprise and a compatible ID authentication device to catch fake IDs and prevent them from being populated into your software.

Pricing

Basic
\$540/year

ID Authentication
\$1080/year
