IDScan.net

VeriLocks Access Management

VeriLocks is robust visitor management meets secure access management. It uses ID validation and age verification to determine if an individual is eligible for entry.
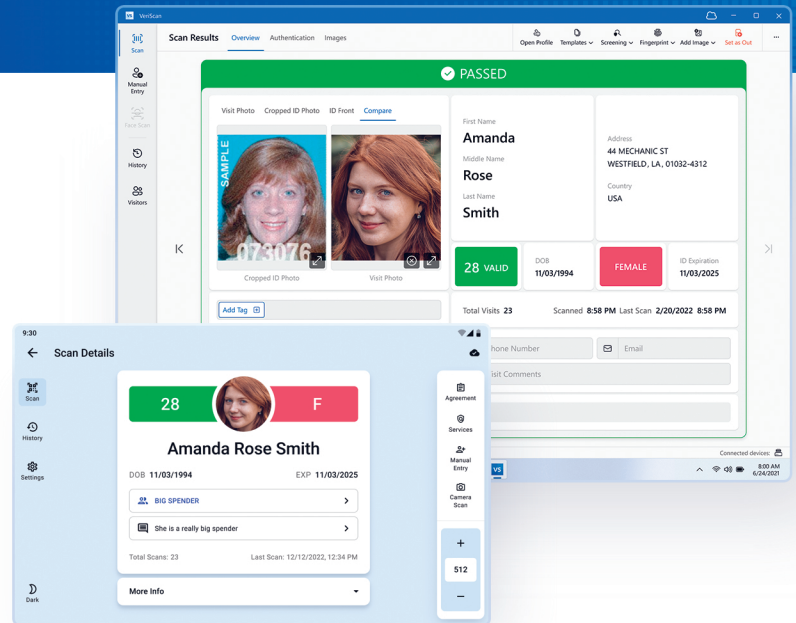

How it works

1 Use the **VeriScan** Admin Portal to create banned and allow lists for each entry point, or to set entry thresholds such as "must be 21 to enter."

2 Guests approach the **Falcon** scanner and follow visual prompts.

3 Guest scans the back of their ID - the **Falcon** ID scanner includes laser focusing to make ID scanning instant.

4 **VeriScan** validates the legitimacy of the ID.

5 If the ID is legitimate and the guest is on the Allow list, the door unlocks, allowing entry.

The entire process takes <5 seconds.

IDScan.net

VeriScan Integration

VeriLocks' power comes from its integration into IDScan.net's core offering: VeriScan Visitor Management. Each ID scan is recorded. A profile for each customer is created that includes key information such as name, date of birth, and address. Each subsequent visit will be saved to their user profile, which can be added to lists, groups, and exported.

VeriLocks can be synced with existing ID scanners running VeriScan software, to provide your organization with a full picture of access management and age verification across all entrances.

Inside the VeriScan Admin Portal you can manage your Allowed and Banned lists, change and update settings, and review demographic reports about your visitors, based on age, gender, and zip code.

Specs

The VeriLocks system works natively with the IDWare Falcon, which is a horizontal mobile scanning device.

- 8" wide durable touchscreen

- Rated for outdoor use between -20°C and +55°C

- Scans government issued IDs, military IDs, and mobile IDs (mDLs)

- Includes keypad and RFID key fobs for internal team override

- 232mm x 158mm x 22mm

Benefits

✅ VeriLocks removes the need for RFID key fobs or entry cards. Guests can simply use their existing ID to verify their identity.

✅ Each unique entry is logged into the VeriScan Visitor Management for easy in-tracking and audit logs.

✅ VeriLocks automatically captures all information stored on the ID into the visitor management platform with 100% accuracy.
